Kohimarama Yacht Club - Venue Specific Hazards

1. Kohimarama beach is heavily used for recreation. Competitors must take particular care to avoid contact with swimmers as they leave and return to the beach.
2. Competitors should take particular care to control their yacht boom swinging in the wind when on shore particularly on the beach ramp and adjacent footpaths.
3. Kohimarama beach and foreshore has significant numbers of sharp oyster shells and competitors should take precautions to avoid cutting their feet.
4. Competitors should be aware that Tamaki Drive, the road adjacent to the yacht club, is a busy arterial road. Extreme care should be taken when crossing.
5. Competitors are advised that reefs are located to the east and west of the sailing waters off Kohimarama beach. These reefs are covered by very shallow water and can be identified by a red or green marker pile at either end. Yachts should not attempt to sail over these reefs.
